

Experts at Schools' Payroll Services

Providing for Your Employees

Delivering HR and Payroll Excellence

Liberata manages the payroll for hundreds of schools, academies and trusts. In Worcestershire alone, where we have been working with the County Council to provide services since 2016, Liberata pays over 13,000 staff across more than 300 schools.

Another important Liberata school client is the Rivers Church of England Academy Trust where we pay 510 staff across ten schools with a further three schools and 200 staff members joining from April 2021.

For both these clients, Liberata utilises the iTrent cloud-based HR and Payroll solution. This solution provides full employer, manager and stakeholder self-service capability along with the ability to handle multiple, complex sets of terms and conditions with associated remuneration packages. The iTrent solution is integrated into the clients' financial systems using a flat file interface that keeps the cost and complexity of the integration down, but maximises the availability of the system and the flexibility of the integration.

Reinventing School Services

We offer services covering budgeting, accounting, HR consultancy, HR Business Support and a Payroll and Pensions Administration service:

- **Dealing with Legislation updates, tax and NI changes**
- **Extensive reporting covering overall costing reports, payroll change reports and change threshold exception reports**
- **Proactive management of sickness and absence**
- **TUPE transfer for schools converting to academy status or joining established academies**
- **Understanding the impact of National Funding Formula**
- **Financial changes for schools converting to academy status**

Using our seamless support services in HR and Payroll, you will benefit from our team's in-depth knowledge and commercial experience to help you deliver.

All services available under G-Cloud 12

Staff pay issues are no longer an issue

We have been working with Liberata for around five years now. The service that they provide is much more accurate compared to our previous supplier which is very important to me – issues with staff pay is a problem that I am happy not to have! There is a great support function but fortunately I have not have much need to use it
